

Admission tied to completed staged checks

LOCAL EVIDENCE / REMOTE CI NOT YET RUN

Report ID 20261001-210513-local-admission
Prepared UTC 2026-10-01 21:05:13
Author / role Bijan Mousavi
Parent commit: 270a1f1373c636e234f5ceca81e7ba30bb9d5a54
Candidate SHA-256: ebf0a28bbff830fe20e744c656b37167553bbce1eb2a9c1107452581a0ee4640
Fingerprint excludes only this report's JSON/TEX/PDF; it is not the final commit SHA.

WHY / problem and value

A readable report cannot authorize a commit unless its exact staged payload actually passed the required checks.

WHAT / change scope

Add preparation, concurrent bounded gate execution, receipt-based report generation and staged triplet/trailer freshness checks.

HOW / implementation rationale

Freeze parent and payload, collect every process result, generate twice from real completed receipts, then compare the staged bytes and commit trailer. Unknown application scope includes both adapter builds.

WHERE / affected paths

scripts/verification/
tests/verification/
package.json; Makefile; makes/reports.mk
reports/README.md

PRESERVED / existing contracts

Original application commands, source, lock, assets, adapters and deployment are unchanged. Preparation and finalization never stage or commit automatically. Prior report identities stay intact.

RISK / what could go wrong

Local receipts are contributor evidence and cannot replace independent CI. TeX has no shell escape but requires an isolated secret-free environment for untrusted contributions.

LIMITATIONS / what is not proved

13 developer, 57 report and 20 verification tests passed on the frozen index. This tooling-only candidate required no application build. No browser, viewer, platform or remote CI claim.

ROLLBACK / restore and verify

Revert admission tools and aliases together in a new reported commit. Preserve failed attempt evidence and the existing export/report utilities.

VALIDATION / actual local evidence

Gate	Command / check	Outcome	Duration	Evidence
Toolchain	npm run doctor	PASS	0.39 s	artifacts/admission/20261001-210513-local-admission/results.json
Developer tests	npm test	PASS	1.73 s	artifacts/admission/20261001-210513-local-admission/results.json
Report tools	npm run report-test	PASS	5.81 s	artifacts/admission/20261001-210513-local-admission/results.json
Staged controls	con- npm run verification-test	PASS	7.06 s	artifacts/admission/20261001-210513-local-admission/results.json
Index hygiene	git diff --cached --check	PASS	0.02 s	artifacts/admission/20261001-210513-local-admission/results.json

Remote validation at authoring: NOT_RUN. Later CI belongs to the immutable commit's check records, not a follow-up report commit.
